## eLearning Module Overview

Countries around the world are implementing Automatic Dependent Surveillance – Broadcast (ADS-B) technology to enhance or extend the surveillance capability of their air traffic control (ATC) systems. The ADS-B module covers operating procedures, flight planning, MEL procedures, human factors considerations, ADS-B phraseology, normal and abnormal system operation, aircraft IDs, data source errors, and incident reporting.

## Module Content

- ADS-B phraseology
- Aircraft IDs
- Data source errors
- Flight planning
- Human factors considerations
- Incident reporting
- MEL procedures
- Normal and abnormal system operation
- Operating procedures

## Recommended Audience

Pilots

## Regulatory Compliance

CASA CAO 20.18 Appendix XI

EASA AMC 20-24

FAA Advisory Circular (AC) 90-114

FAA Operation Specification / Letter of Authorization A153

Hong Kong Airworthiness Notice 102F

Transport Canada AC No. 700-009

## Module Duration

1 hour
