eLearning Module Overview

The High Altitude Weather module was designed for pilots operating higher performance aircraft that routinely operate above 25,000 feet. It will help you recognize and correctly react to weather hazards that you could encounter while flying at high-altitudes.

Module Content

- Tropopause
- Jetstreams
- Mountain Waves
- Volcanic Ash
- Ozone Contamination
- Preflight Planning

Recommended Audience

Pilots

Regulatory Compliance

FAA Advisory Circular (AC) 61-107B

Module Duration

1 hour
