eLearning Module Overview

The Automation Management module includes 9 Principles of Automation Airmanship to apply to advanced aircraft operations. The goal is a more organized, disciplined and rewarding flight deck experience for flight crews. For operators, these principles support safety and operational efficiencies that help capture the promise of advanced technology.

Module Content

- Tapping into Technology
- Automation 101 – A Few Essentials
- Technology and Error – New Ways to Fail
- High Drivers of Excellence
- Synergies

Recommended Audience

Pilots

Regulatory Compliance

IS-BAO Standard Chapter 5

Module Duration

1 hour
