eLearning Module Overview

Based on accident statistics, you are 50 times more likely to have a runway excursion than you are a runway incursion accident. The Runway Excursion module reviews risk factors associated with runway excursions, such as rejected takeoffs, non-compliance with SOPs, long touchdowns, and contaminated runways. Risk mitigation techniques such as stabilized approaches, proper performance planning, and constant angle descents are presented.

Module Content

- What Is a Runway Excursion?
- Takeoff Risk Factors
- Landing Risk Factors
- Risk Mitigation

Recommended Audience

Pilots

Regulatory Compliance

IS-BAO Guidance Material 5.1

Module Duration

1 hour
